

# Hello!

My name is Oliver Morris.

Graphic Designer & Data Analyst

## PROFILE

business@oliver-morris.co.uk

07495820178

oliver-morris.co.uk

With over half a decade of experience in "the art of Visual Communication", I have realised that using terms like that gets you nowhere. I'm a Graphic Designer specialising in (but not limited to) UI design and branding.

Alongside Graphic Design, I have become a full-time Data Analyst. Working for the past three years in Human Resources within Local Government. Working from the bottom and continuously learning.

## SKILLS

InDesign

Illustrator

Photoshop

XD

Oracle

HTML / CSS

## EDUCATION

2012

Visual Communication Qualification

2014

Dudley College of Technology

Finished with Double Distinction and Merit. I received three offers from universities but decided that my path was better suited for the world of work.

## EXPERIENCE

2014

Freelance

Graphic Designer

After leaving Education I decided to go it alone and put all my effort into becoming a full-time freelance Digital Designer and although my career path has changed I still remain a freelance designer.

2015

Hidden Fashion

Photo Editor

When trying to find work as a Designer I took on any job that would help me along the way. I had a brief stint working as a photo editor with what was at the time a small clothing company.

2015/16

The People's Orchestra

Head of Media Production

I started at The People's Orchestra as a volunteer, trying to gain experience working for a bigger organisation. I ended my tenure at the orchestra as the Head of Media Production. I would work long hours, editing concert videos, producing social media content and designing their website. Working to manage volunteers that would come and go trying to get as much experience as they could from working in a busy environment.

2016

Sandwell Council

Data Analyst

This brings us to, today. I currently work with Sandwell Council in the Workforce Analytics team. Honing my skills as a Data Analyst and building a career for myself. Specialising in Employee Engagement data and looking at how engagement has an affect on a workforce.
